

# SALT GROUP

## Authentication on the move...

*Salt Group's mobile security technology provides customers with secure service delivery opportunities that were once thought unattainable.*

Salt Group is an Australian IT Security company helping businesses and organisations with their electronic service delivery needs. With particular focus on securing internet and mobile delivery channels across a range of business sectors and application areas.

Salt Group has a successful track record working with financial services, large corporations and government; to develop strategies and design solutions to enable businesses to better manage their risks and obligations in delivering services electronically; often incorporating mobile security products that have been developed in-house by Salt Group in Australia along with complementary third party best of breed products.

### Product Development & Support

Salt Group's flagship product family, Salt Mobile has been actively developed since 2005 and is continually extended to incorporate new and emerging technologies such as NFC, Geo-Location and Biometrics. This ensures that our customers remain well placed to respond to evolving online security threats using modern authentication mechanisms that are fit for purpose and adaptive to ever changing risk profiles.

In the field, the Salt Mobile product family has proven reliable, user-convenient and cost effective; Salt Mobile has been deployed throughout Australia, New Zealand, South East Asia and in Europe where Salt Mobile is marketed under the Thales SafeSign product line.

Salt Group's 'connected' token is demonstrably more secure than physical tokens and typical smartcard solutions for securing critical internet delivery authentications.

### Product Reseller

Salt Group is a reseller of core Thales eSecurity products in the Asia Pacific region, in particular the Thales SafeSign suite and Thales nShield Hardware Security Modules (HSMs). Similarly, Thales eSecurity is a global reseller of Salt Group's Mobile products which are fully integrated with Thales SafeSign Authentication Server middleware.

Salt Group is a reseller of –

- Thales SafeSign authentication suite;
- Thales nShield and SafeSign Cryptographic Security Modules;
- Intercede's MyID product in Australia and New Zealand. MyID manages the secure registration and verification of identities and issuance and lifecycle management of devices and credentials such as smartcards.

Salt Group capabilities extend to writing Secure Execution Engine (SEE) code residing on nShield HSMs to create a Trusted Appliance where keys and applications can work together in a secure environment provided by FIPS 140-2 validated nShield HSMs.

### Systems Integration & Consulting

Salt Group consulting services are underpinned by expert professionals with many years of practitioner experience and respect within our focus areas.

Salt Group is experienced in systems integration services to develop end-to-end solutions that combine systems, applications and packages to support business functions and security throughout the enterprise. Salt Group offers unmatched technical expertise in the Asia Pacific region across a wide range of security technologies and industry leading platforms, including Thales eSecurity products, HSMs, Card Management Systems (CMS), Smartcard and PKI systems, Identity Management (IDM) and open systems.
